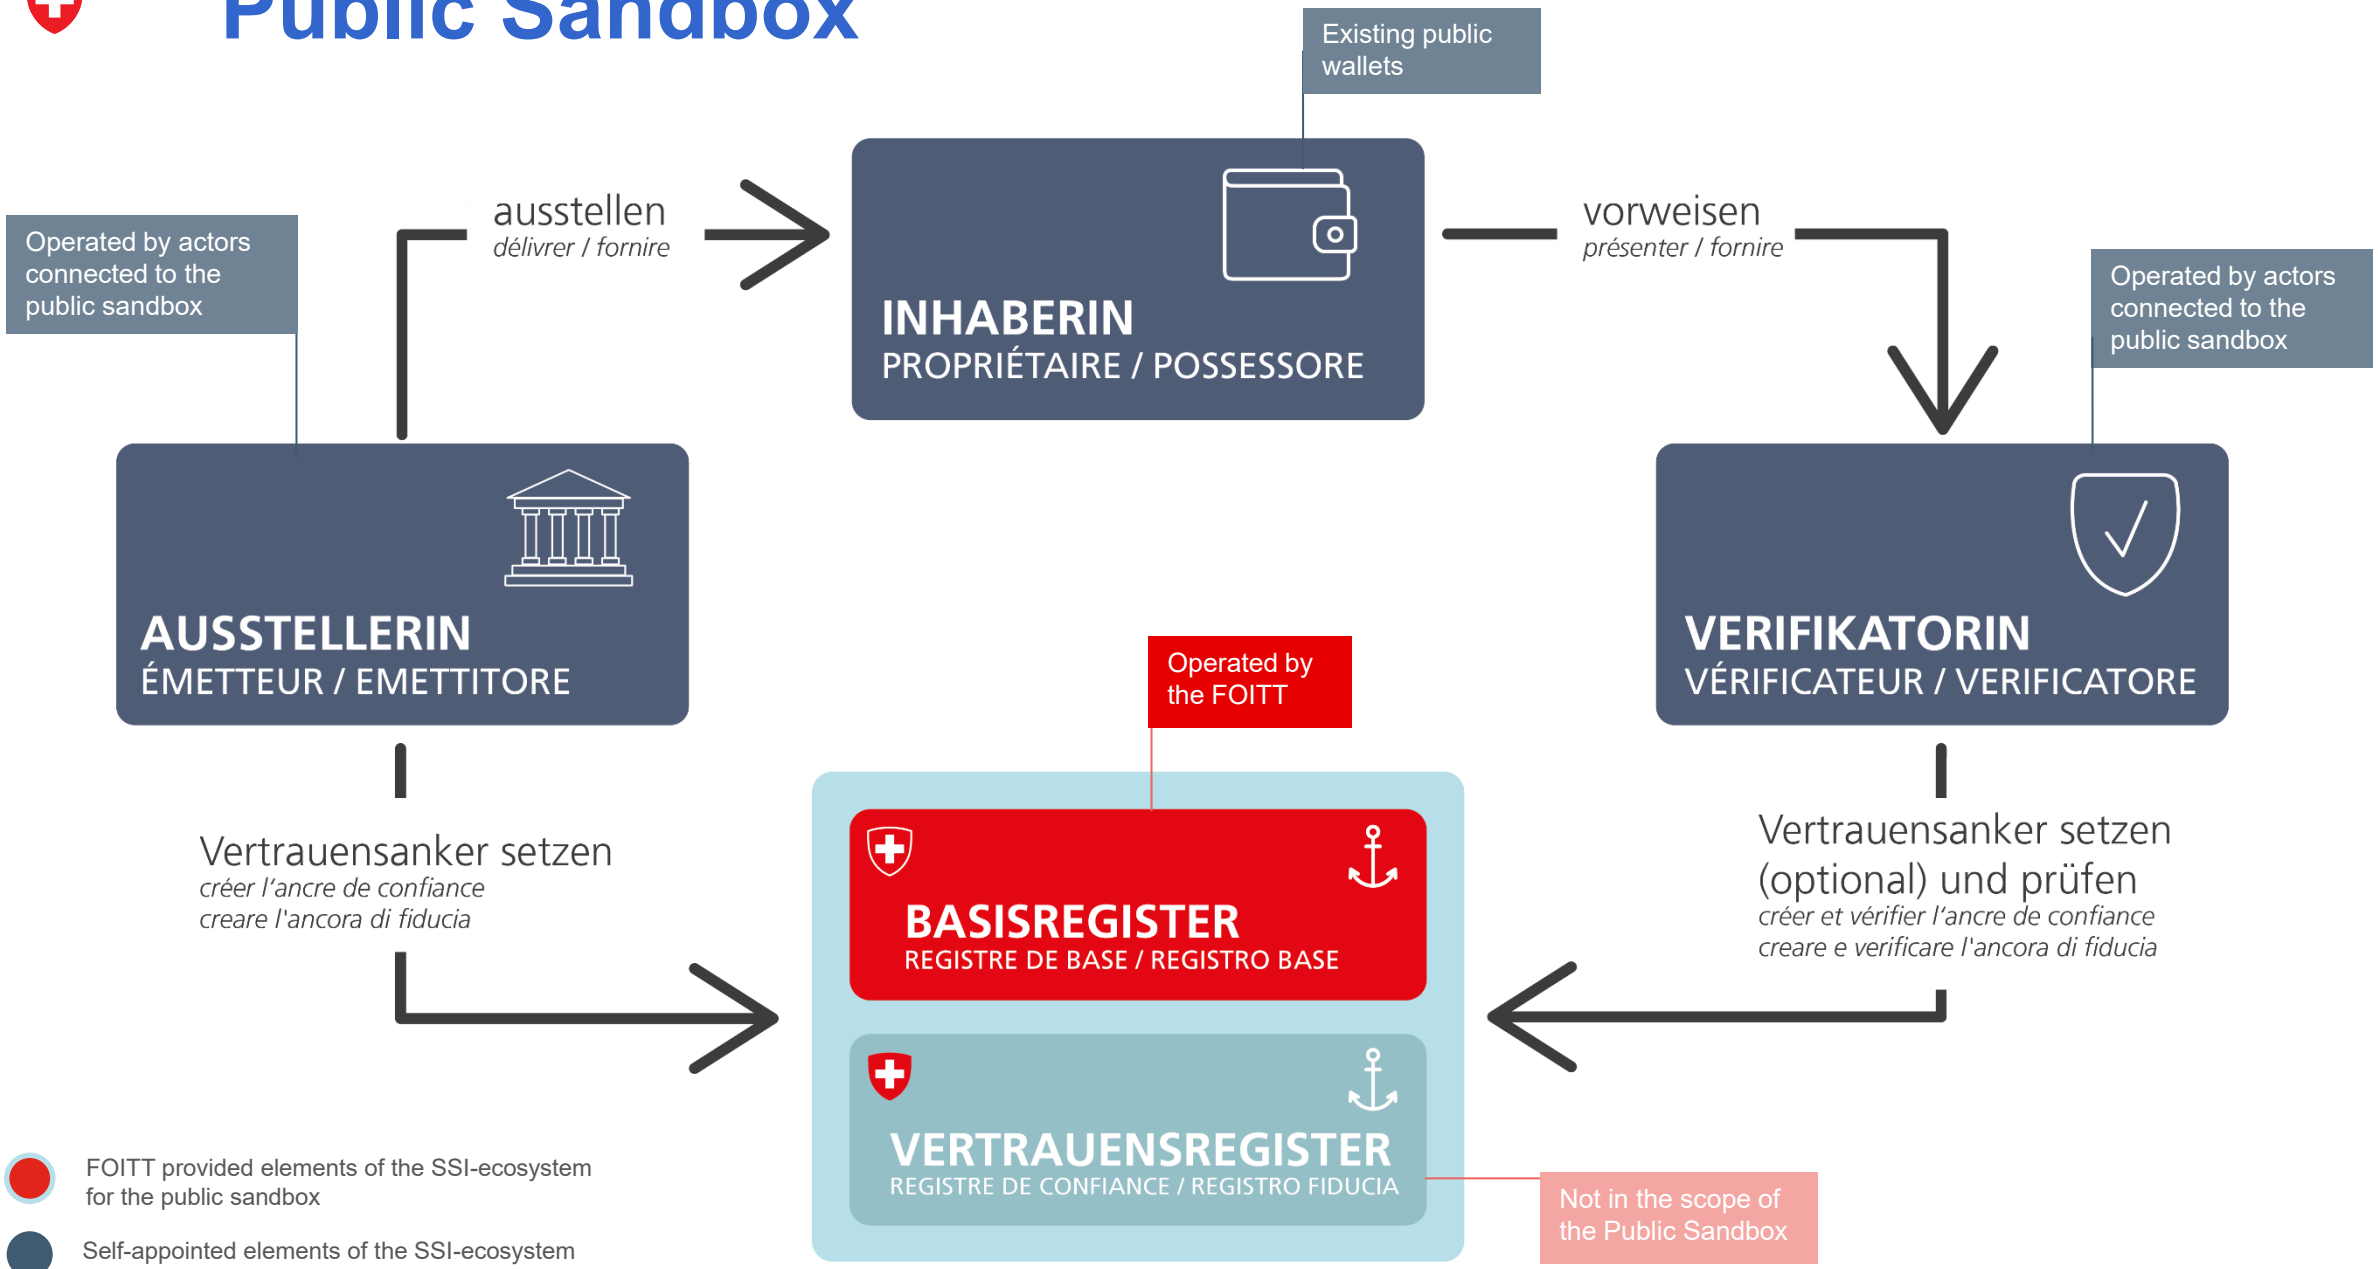
Update: Public Sandbox de la Trust Infrastructure

Partizipationsmeeting / *Réunion Participative*, 02.03.2023

Public Sandbox



Public Sandbox – Key Info

Goals:

- Enable further SSI-Pilots
- Generate early on learnings for the whole ecosystem and its actors
- Gain technical and organizational experience through experimenting
- Build a culture of collaboration in the ecosystem

Frame:

- 30-40 participants
- Onboarding test mid-March
- Every party involved in the use-case and transforming data has to be listed in the application form and needs to sign it in order to receive access to the base registry.
- Release in Q1 is still our objective. We will inform you at the time of the launch.

Public Sandbox – Onboarding Process
