Requirements: The principles as in the six motions and proposed law (Gesetzesvorentwurf)

- **Privacy by Design**
 - "A holder can present a verifiable credential to a verifier without the issuer being informed."
- **Data Minimization**
 - "A holder can define which credential, which parts of a credentials (selective disclosure) or which derived information of a credential shall be transmitted."
- **Decentral Storage of eID**
 - The credential is sent from the issuer to the holder and from there presented to verifiers.
 - The choice of the technical means of storage is up to the holder.
 - No credential information resides in the base registry except revocation information.
- **Governance**
 - The system is run by the Confederation
