

#DICE2023

# Digital Identity unConference Europe 2023 Zurich

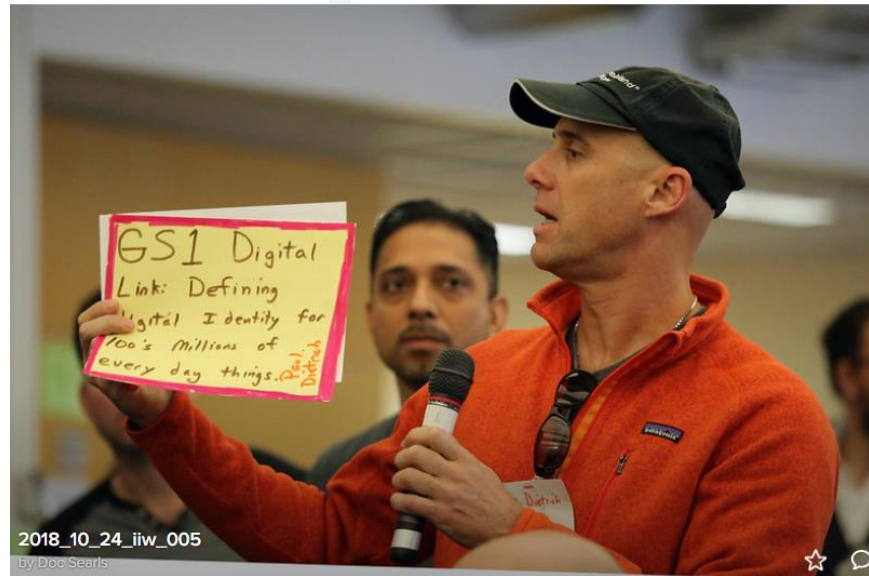

Fostering Collaboration on digital identity between governments, citizens and companies across Europe.

[www.diceurope.org](http://www.diceurope.org) | Zurich, Switzerland | June 7-9 2023

# About DICE

The event is inspired by the Internet Identity Workshop hosted twice a year, since 2005 in California for the global community working on internet identity. The time is right to host an event for Europe with the same Open Space Technology unConference format that IIW uses.

# The Event in a Nutshell

## June 7 – Pre-Conference

- Introductory sessions for beginners that want to get primers on key topics and concepts of digital identity ahead of the unConference
- Intros, Talks and Panels focused on government digital identity initiatives in Europe and globally
- Closing of the Pre-Conference will be the official start of the unConference (Welcome Event)

## June 8-9 – 2 Day unConference

- We co-create the agenda live in person first thing in the morning each of the two days.
- This process is facilitated by experts and generates very alive session topics.
- Notes for each Session are taken and submitted to be compiled onto a Book of Proceedings that is shared after the event.
- Some of the best interactions at #aDICE2023 will happen over a drink or meal. Dinners and Reception are included in the price of your ticket so there is plenty of time to continue conversations and network.

# The Event in a Nutshell

## Team & Partners

- This event is inspired by IIW and is being co-organized by one of the founders, Kaliya Young and longtime event producer and facilitator Heidi Nobantu Saul.
- The conference is supported by leading innovation houses, associations and universities in Switzerland:

**HSLU** Hochschule  
Luzern

**pro-civis**  
AN ORELL FÜSSLI COMPANY

## Audience & Location

- 200+ of the most influential people on digital identity standards will join during 3 days in Zurich, Switzerland June 7-9
- The event is happening at Trust Square in Zurich, Switzerland. Zurich is in the heart of continental Europe, a place where a lot of innovation is happening, especially also in the world of decentralized technologies, with world leading universities and easily accessible by train and plane from anywhere in Europe and the world.
