#### Introduction

- Test use cases of Ambition Level 3 in the ecosystem across companies
- One credential, several use cases, various issuers and verifiers (internal and external)
- Standardization of VC is key in both the public and private sectors

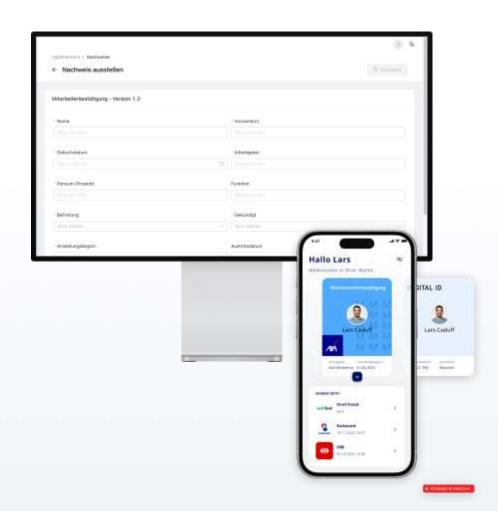

## Objectives

- 1. Understanding the added value of digital credentials in specific business processes
- 2. Determine the differentiation of Confirmation of Employment based on multiple use cases
- 3. Defining different processes and interfaces
- 4. Identify opportunities and challenges for a productive solution
- 5. Collect **feedback** from employees and internal stakeholders
- 6. Develop user know-how about SSI

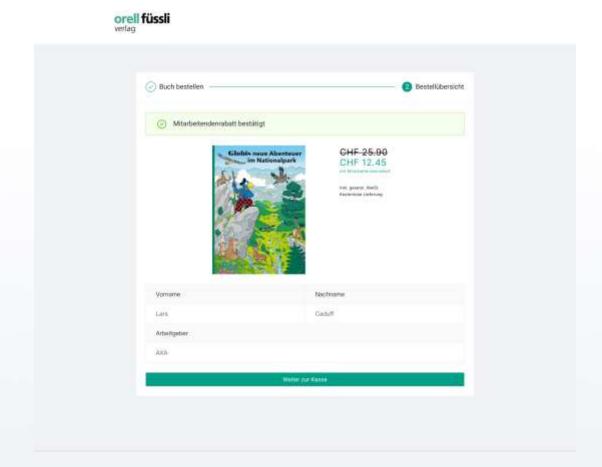

# Four use-cases across companies

- Four different use cases were simulated in the PoC
- Each company has created its own test
   environment and integrated Procivis' SSI system
- Each company had test users from its own company, who received a Confirmation of employment
- The test users were able to use the test system of their own company as well as those of other companies
- → The result: cross-company applications

# Orell Füssli - Employee discount on book orders

- Online ordering of books with employee discount by means of verifiable Confirmation of Employment
- No company account required

all 🕏 Tuesday, 9 January 09:41

## Swisscom - Employee discount for partner companies and ID check

- Online purchase of a smartphone with a company discount for partner companies
- Proof of company affiliation by means of Confirmation of Employment
- Verification of identity (Telecommunications Act) via an "E-ID"
- Combined information request
   (two credentials in one request) and automated integration of the provided information into the purchase process

## AXA - Request of a payment protection insurance

- Payment protection is an insurance product that covers monthly payments for rent, health insurance, leasing etc in case of unemployment or illness.
- The product is available for employees on a permanent and not terminated contract working at least 25 hours per week
- With verifiable credentials instead of checkboxes, we can increase onboarding process and underwriting quality

#### Module selection

The payments insured are recurring payments/installments in the insured modules in the event of involuntary unemployment or full incapacity to work following illness or an accident.

# Zahlungsschutzversicherung

#### Modulauswahl

Versichert sind wiederkehrende Zahlungen / Raten der versicherten Module bei unverschuldeter Arbeitslosigkeit oder bei einer vollständigen Arbeitsunfähigkeit infolge Krankheit oder Unfall.

Arbeiten Sie mindestens 25 Stunden pro Woche (rund 60 % Pensum) in einem unbefristeten und ungekündigten Arbeitsverhältnis n der Schweiz oder sind Sie selbstständig erwerbend? \*

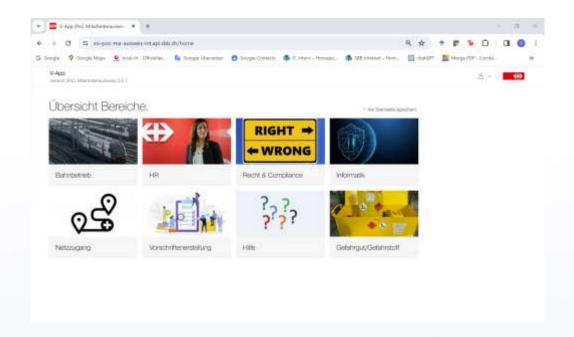

JA NEIN

Die Zahlungsschutzversicherung besteht aus verschiedenen Modulen, die Sie nach Bedarf bei uns abschliessen können. Welche Module interessieren Sie? \*

	Mobilität (Leasingrate & Auto-Abo)
	Wohnen (Miete & Hypothek)
	Gesundheit (Prämie der Krankenkassen-Zusatzversicherun
Г	Übrige Ausgaben (Pauschalbetrag)

#### SBB - Service access via verifiable credentials

- Authentication and authorization by means of verifiable Confirmation of Employment
- > Access rights depending on attributes of the verifiable credential: company and role

## Learnings

- 1. Secure digital identification without physical IDs or insecure email accounts thanks to digital credentials.
- 2. Immediately verified information reduces the effort of manual proof checks and enables new opportunities and possibilities.
- 3. Smooth, technical integration into existing identity management ensures high acceptance and user-friendliness.
- 4. Cross-company standardization of Confirmation of Employment is necessary for use across different companies.
- 5. Internal stakeholder involvement and user education about SSI was enabled by tangible PoC with real world use cases.
- Critical success factor: clarity about the future trust infrastructure
